A CONCRETE FOUNDATION OVER 100 YEARS IN THE MAKING

1912

G.H. Strayer founded Erie Steel & Construction Co., making structural steel for commercial buildings, buckets, overhead cranes, and aggregate bins.

1920-30

Erie Steel & Construction Co. began to fall into a niche, shipping buckets and evolving storage bins into concrete batch plants.

1940-50

The company changed its name to ERIE Strayer and focused on concrete batch plants and clamshell digging buckets.

1960-80

ERIE Strayer's product line of concrete batch plants continued to innovate and ultimately define the industry.

2000 & BEYOND

A narrowed focus to concrete batch plants, computer controls, and replacing/refurbishing competitive equipment.

Fourth Generation

Family owned and operated for four generations.

INNOVATION

ERIE strives to always remain at the forefront of custom engineering by continuously improving our equipment design, our facilities, and our processes.

- 2020 High precision plasma cutting technology
- 2020 custom PPG paint finish
- State-of-the-art computer controls with remote diagnostics and real-time plant notifications
- Increased production capacity for tilt mixer and silo construction

SAFETY & DURABILITY

ERIE is committed to safety and longevity and it shows in the design of our equipment. That is why our concrete batch plants can be equipped with the following:

- Automatic central lubrication on all major wear components
- Plant and mixer monitoring systems
- Proprietary Duroxite bucket and blade design with chromium carbide overlay
- Programmable logic controller (PLC) for tilt mixer and aggregate handling drive
- Variable Frequency Drive (VFD) for mixer rotation & idle speed

COMMITMENT TO QUALITY

ERIE is committed to designing and manufacturing the highest quality concrete batching equipment on the market. Our equipment is designed in accordance with:

- American Institute of Steel Construction (AISC)
- American Society for Testing & Materials (ASTM)
- American Welding Society (AWS)

In addition to the above, ERIE is charter members and conforms to the following:
